

Activity 2 - Hash

Create a PHP page that sends a password to a database and saves the results utilizing the md5, sha1, and sha256 hash algorithms:

- Utilize a salt value for the md5.

id	name	password	salt
5	control	12345	
6	md5 with salt	f89ffbd69ac24874fe14f27b27685113	2Sa&DMu%@T!oMs8d
7	sha1	8cb2237d0679ca88db6464eac60da96345513964	
8	sha256	5994471abb01112afcc18159f6cc74b4f511b99806da59b3ca...
